A volcano under the sea

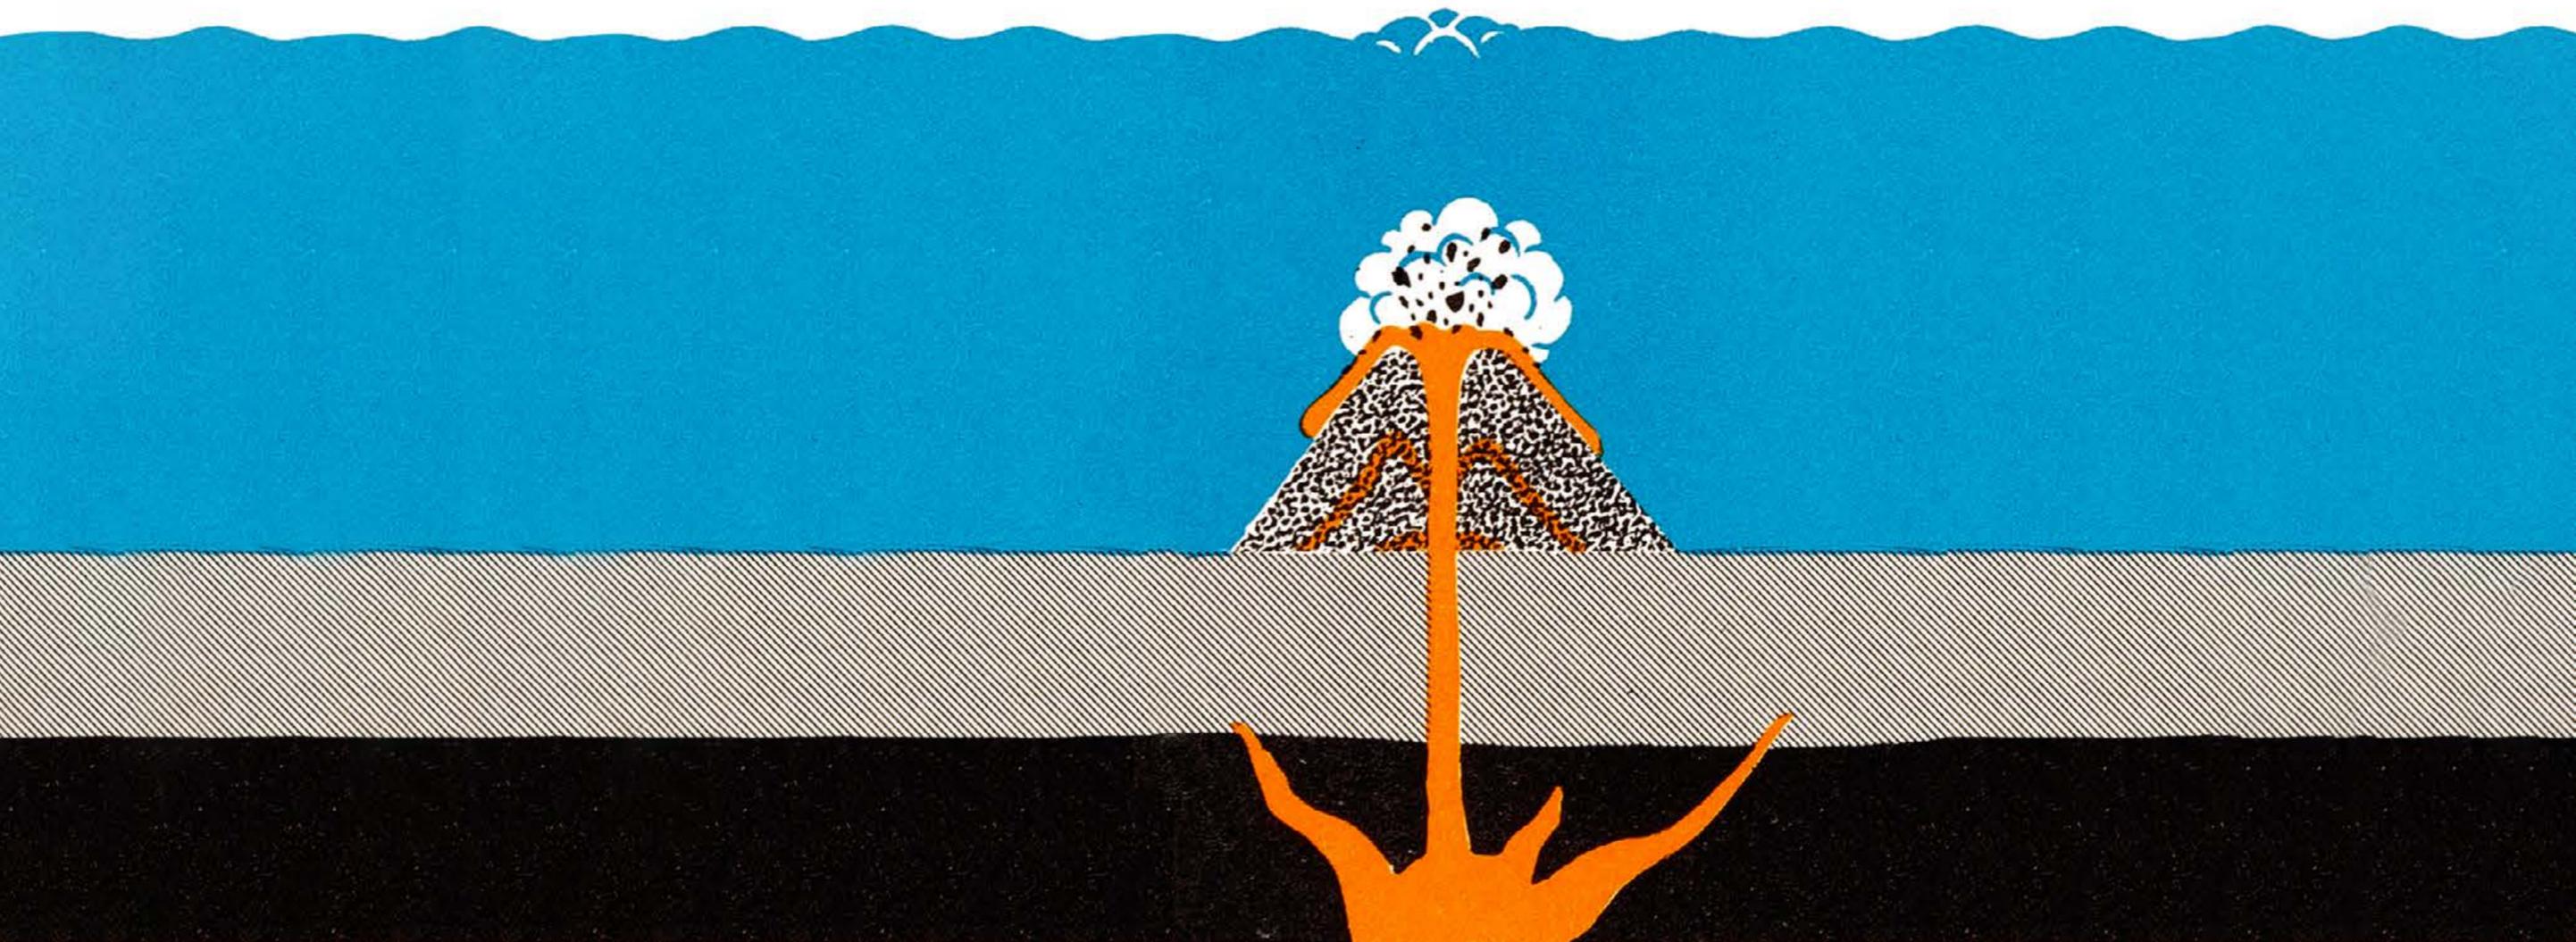

Touch the pink buttons and see what happens.

◀ ▶ Use the arrows to move backwards and forwards.

✕ Touch the cross to close a window.

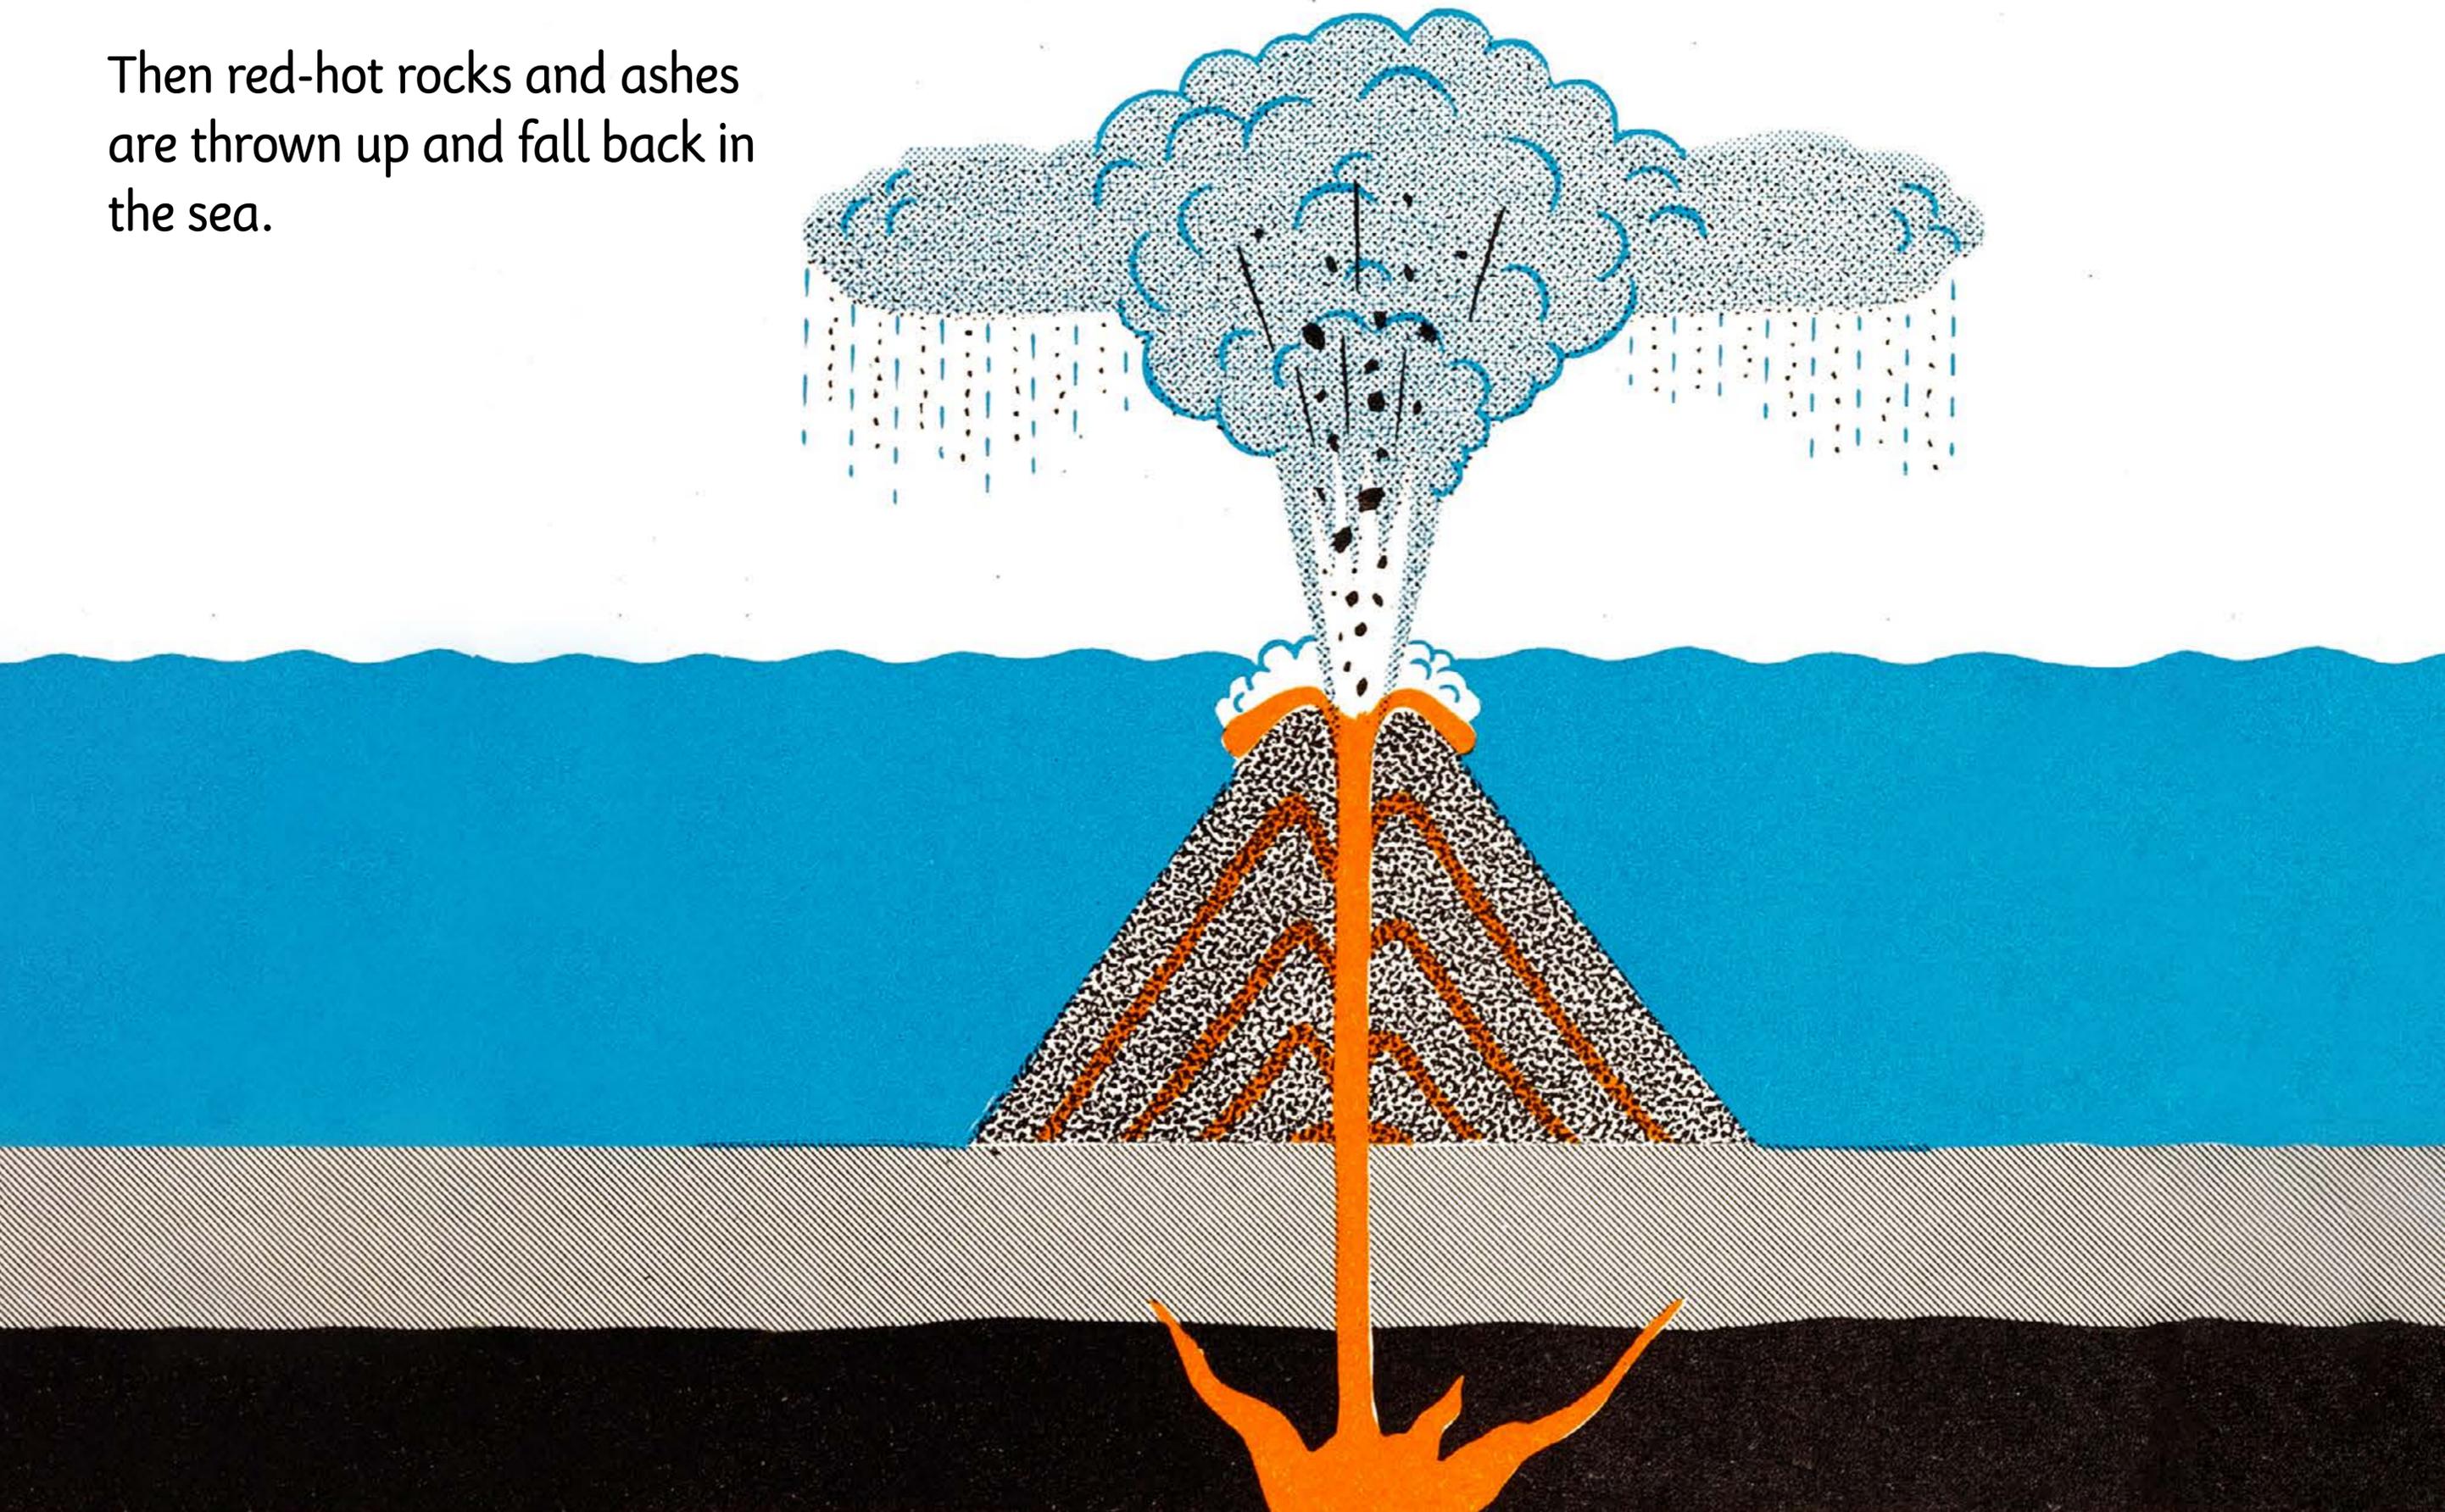

A volcano under the sea

When a volcano bursts into action under the sea, it can build itself up rapidly until its top may rise above the waves.

A volcano under the sea

Then red-hot rocks and ashes are thrown up and fall back in the sea.

A volcano under the sea

Such a volcano, when it is 'dead', makes an island in the sea, and plants and animals and people can live on it.
